

## Junior Project Engineer

### The Position:

OOS International is currently building two new semi-submersibles crane vessels which will focus on heavy lift installation and decommissioning jobs. To support feasibility and detailed engineering studies of these projects, OOS is increasing its engineering capacity with new Junior Project Engineers.

Furthermore, the project engineers provide engineering support for the departments of Operations, Technical, Newbuilding, HSEQ and Business Development. The junior project engineer is part of our Operations-team which reports to the Operations Manager and is responsible together with his colleagues for the engineering services within OOS. Given that Engineering is a relative new part of OOS, the team is expected to grow significantly in the next couple of years. The ideal environment to grow along with OOS.

### Job Description:

#### Duties and responsibilities:

- Works independently and pro-actively;
- Demonstrates ownership and has a sense of responsibility and urgency;
- Has strong analytical skills and is a team player;
- Is willing to travel abroad to support the projects.

#### Education/Experience:

- We are looking for a recently graduated engineer with preferably a Master of Science, but also experienced engineers are welcome to apply for the job;
- Relevant experience with engineering in maritime/offshore (or eager to gain this knowledge);
- Excellent skills in spoken and written English;
- Knowledge of Microsoft Office and preferably Autocad or another CAD drawing program.

### We offer:

- A job in a varied, international working environment with a lot of responsibility;
- A dedicated, young and dynamic team where every member strives for the best team results;
- Prominent international career opportunities;
- A fulltime position for a definite period of one year. An indefinite contract after proven suitability;
- A dynamic job, mainly in our office in Serooskerke and as well abroad.

### About OOS International:

OOS International is a young, ambitious International Organization that manage dynamical positioned and anchored semisubmersible floatels. We provide offshore accommodation crane vessels and operational services to oil- and drilling platforms. For more information please review our website:
