RESPONSIBILITIES

Operations

The responsibilities of the Master/ OIM include, but are not limited to, the Health, Safety, Security and Welfare of all personnel working on the offshore installation and the protection of the environment.

The Master/ OIM is responsible for the operation of the vessel, the gangway and all other plant and equipment within safe limits and in accordance with the terms of the contract. They are the client's and the diving operator's (if relevant) contact person on board in connection with any contract. They will notify the owner of the consequences of deviating from the contract requirements and at no time shall they agree to any deviation without advising the owner.

They are responsible for maintaining operational records and files on board and for ensuring that the certification is always kept up to date.

The Master/ OIM is responsible for the implementation of the Shipboard Management System. They shall, without delay, report to the Company possible modifications that they consider necessary to ensure safety and environmental protection. They are also responsible for regularly reviewing the system with a view to identifying and recommending improvements. A record of Master/ OIM's Reviews shall be maintained on board and is part of the Company Management Review.

The function of the Master/ OIM is to evaluate all situations, whether normal or of an emergency nature, and to take proper actions to avoid or minimise potential damages or losses, with special regards to life.

All decisions and actions should be based on the safety of personnel and equipment and to further the interests of the Company and the Client.

The Master/ OIM has the overall responsibility for the safety and integrity of the vessel and for the safety and discipline of the persons on board.

The Master/ OIM is responsible for all reporting to appropriate authorities as required by law.
